

We empower your logistics

Our name says it all! Tailormade Logistics (TML) is focussed on its customers and offers logistic solutions tailored to your unique requirements. We listen, advise, execute and evaluate. Our efficacious solutions are often also innovative.

Without our reliable suppliers and loyal clients we could never have achieved what we have done in the past ten years. And our motivated employees, who think of a solution for every problem, have laid the foundation of our success. We thank them all.

In this magazine we give you an impression of our extensive range of possibilities. Time never stops for a dynamic company like TML, so we also give you a little taste of the future. In offering knowledge, ease and savings, we will meet all challenges and will be your reliable logistics partner for the future.

Bert Vandecaveye

Board of Directors

Not your core business, but ours!

To most medium-sized companies logistic processes do not belong to their core business. However outsourcing seems out of their depth. Tailormade Logistics (TML) has adapted the logistical knowledge of large market players and makes it accessible for medium-sized companies.

Endless options

The options are endless. TML facilitates transport solutions such as groupage, express service and just-in-sequence delivery with its own trailers or reliable partners. Logistics solutions such as storage, packaging, customizing, quality control and assembly are possible in the large warehouses in Ghent or can be implemented as in-house facilities.

Heart of Europe

TML is located in the heart of Europe. The port of Ghent, Belgium is only three hours from Paris, London, Cologne and Amsterdam. Railways, roads, inland waterways and the sea port are excellent for multimodal transport and all related services.

People and values

Tailormade Logistics aims for excellence. Excellence in solutions, in service, in quality, in environmental care, in ethical trading and in partnerships. This quality can only be achieved and sustained through involvement of our highly motivated employees. They project their values onto TML and make sure that all promises to the customers are fulfilled. TML gladly supports them through education, guidance and advice.

Stunning results!

TML is a result driven company. Its aim is to improve customers' results. And these results can be stunning! Implementing TML structures, systems and employees realises cost reductions up to 25 percent. Furthermore this method of working generates mostly direct costs. Minimum investments are needed. TML operates on an international scale and several companies with branches worldwide appreciate the extensive logistic services of TML.

A multitude of trucks

Transport is the most visible service of Tailormade Logistics. Modern equipment for all kinds of loads, systems for tracking and tracing even the smallest package and an efficient planning ensure your goods arrive at the delivery address exactly as agreed.

European distribution network

Thanks to co-operation with partners in lots of European countries, TML is able to meet customers' requirements in all of Europe. TML offers:

- 24/48/72 hour services, using the European distribution network
- 24/24 hours - 7/7 days accessibility
- documentation assistance
- shipment reports, including status update on a daily basis
- experience in handling, labelling and packing part loads

Dedicated transport

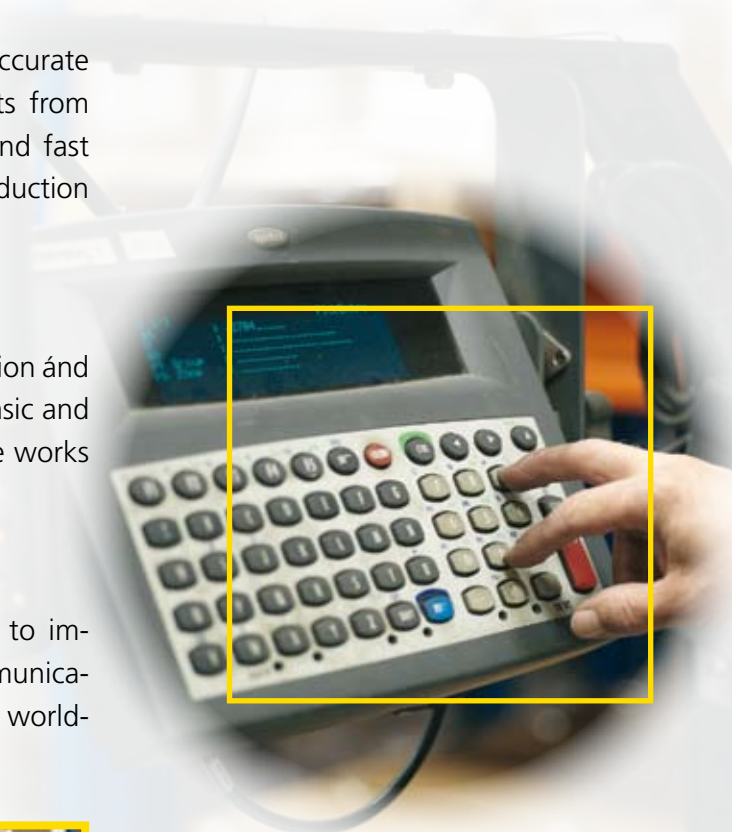

Just-in-time and just-in-sequence deliveries need accurate planning. Tailormade Logistics receives daily requests from customers in branches like automotive, high tech and fast moving consumer goods. Stocks are lowered and production processes improved. Cost reductions guaranteed!

Customs brokerage

Importers often need integrated solutions for distribution and customs. TML offers a wide range of cost effective basic and value added customs-related services. Our experience works for you!

Modern equipment

TML invests heavily in modern technology in order to improve efficiency and communication. Real time communication makes all loads traceable to their current location, worldwide. Transparent and fast.

Room for innovation

Logistics is often mistaken for storage. Tailormade Logistics proves that logistics can be much, much more than that. Supply chain management is a better description. Apart from general warehousing, TML makes people and systems co-operate to ensure an optimum in efficiency.

Made to measure

Customers can expect a plan made to measure for their logistics operation. TML arranges production logistics, distribution logistics and even in-house logistics is a feasible option. Not only large global players profit, also medium-sized companies are able to achieve substantial cost reductions.

Value added activities

General warehousing starts with optimal racking and efficient use of fork-lift trucks, reach trucks and pallet trucks. Apart from storage, TML-warehouses offer a range of value added activities, such as picking, packing, kitting, labelling, quality control, reconditioning and assembly. Our experienced people and modern technology join hands for your results!

Inbound logistics

Production logistics is all about managing inbound goods supply. Together with dedicated suppliers TML arranges for the right product to be delivered to your factory in time.

Vendor management inventory

Consistent demand planning is essential. Sharing data enables suppliers to perform better. TML increases your competitiveness. Results are a reduction of supply chain costs, a reduction of capital tie-up, enhancement of productivity and improvement of product availability.

Merge-in-transit

Companies that source components from several vendors for build-to-order assembling find merge-in-transit helps them improve delivery time. Domestic distribution is kept to a minimum. Efficiency wins!

Room for innovation

Outbound logistics

Distribution Logistics is all about outbound logistics. Automatic picking, packing and shipping are just tiny parts of the total service. TML's strength is optimizing all distribution functions and improving productivity. A complete solution for all distribution requirements comes within your grasp!

In-house logistics

Apart from outsourcing, TML gives the possibility of in-house logistics. All advantages - improving productivity, reduction of operational costs, reduction of investments - are accessible to companies with a logistics operation from five to fifty employees. So accessible to all!

Systems for maximum performance

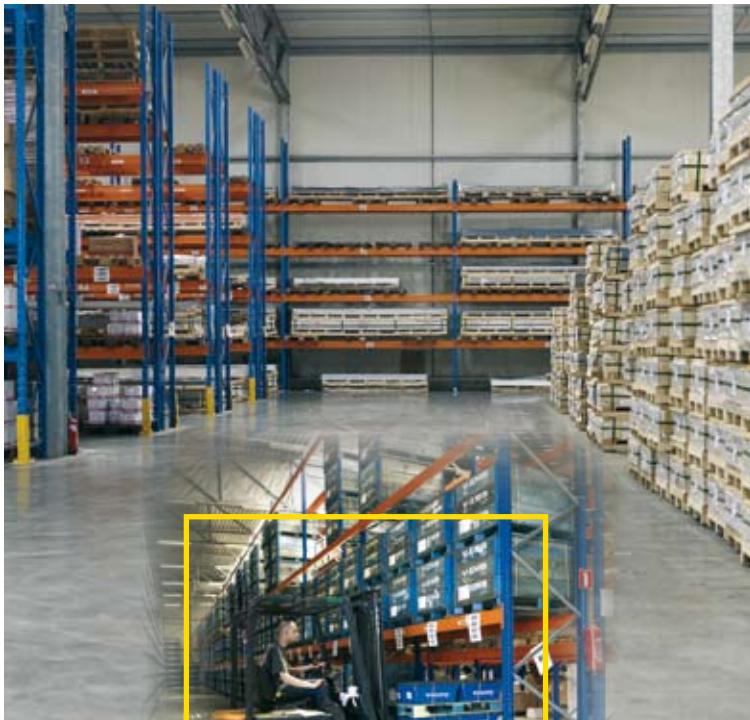

Supply chain visibility and transparency can only be achieved by an advanced level of ICT. In using the type of systems their customers use, TML makes co-operation and synergy possible. Win-win for customers and TML alike!

Real time visibility

TML uses RedPrairie's integrated solutions for warehouse management, supplier collaboration, event management and supply chain visibility. RedPrairie offers leading systems in industrial environments, that generate the best possible results. In using its systems optimally, TML assists industries with real-time visibility of inventories, assets, orders and shipments across the supply chain. Maximum productivity and costs savings are the result.

Tracking and tracing

Transics is European market leader in on-board computers and transport management systems. Thanks to this technology, TML offers real time tracking and tracing of all goods. Fully integrated with sophisticated planning and route optimization systems.

The future calls

International development is the future Tailormade Logistics creates for itself. In Europe, but also across other continents, the name TML will spread. Satisfied customers are the foundation of this success.

In the meantime, TML has been nominated for several awards:

- Transport Safety Award in 2006
- Transport Company of the Year in 2005
- Trends Gazelle 2004
- Ambassador Trends Gazelle 2002

They haven't won yet, but there's always a next time...

Together with its customers and suppliers Tailormade Logistics will continue to excel. Join the winning team!

E²e [Consumer driven optimisation.]

Meet Jack...
**"I need to know I
can deliver perfect
orders, 24/7."**

Jack manages thousands of products and customised orders across countless locations and networks. His challenge is to take the perfect customer order from dream to reality with real-time operational control and efficiency.

Distribution managers like Jack need more than software. They need a revolution. RedPrairie is driving that revolution with E²e.™ End-to-end solutions that can optimise every aspect of retail and supply chain operations, transforming your business into the most dominant force in its category.

When you can efficiently optimise, synchronise, execute and measure each process from the store shelf through the supply chain, you are in complete control to deliver that perfect customer order. Any time, anywhere, and at any volume – all while delivering the highest financial return to your enterprise.

Explore the power of E²e.™ Call +32 (0) 54 32 68 10 or visit www.redprairie.com. RedPrairie. Consumer driven optimisation.™
